

## INVESTMENTS

### DESCRIPTION OF THE CAMPAIGN

As part of the campaign, customers using the Mobile banking investment module for individuals, including those customers who activate the investment module during the campaign period, will be able to use the investment module without trading commissions and monthly investment account maintenance fees.

### CONDITIONS OF THE CAMPAIGN

#### The following customers will participate in the campaign:

- customers already using the investment module at the time of the campaign launch;
- customers who will start using the investment module during the campaign period.

#### The amount of the commission within the campaign:

- trading commission - 0\$;

**Note:** The terms of the promotion do not apply in case of trading in Penny Stocks (stocks worth USD 5 or less). The standard commission for buying/selling stocks worth \$5 or less (so called Penny Stock) is \$0.02 per stock (minimum \$0.5, maximum 1.5% of the transaction amount). Furthermore, for SOLO/WM customers of the Bank of Georgia, in case of Penny Stock trading, the condition of 3 free transactions established when using the investment module as part of the account package activated by them is effective.

- The monthly investment account maintenance fee - \$0;
- The campaign will begin on **September 8 and run through October 31**, but no later than the campaign budget is exhausted;
- In case the budget allocated to the campaign is spent before the campaign ends, the campaign will be terminated as soon as the budget is spent;
- Galt & Taggart has the right, based on the results of monitoring the customers' behavior, to unilaterally disconnect a particular customer from the campaign at its own discretion, after which the standard commissions established for the use of the investment module will be applied to the transactions performed by the customer after disconnection from the campaign.
- SOLO/WM category customers will routinely use the benefits received with the SOLO/WM package (the first three free trades will still be valid)
